Setting up a cluster with Docker Swarm

NEXT 

How to do it

Getting ready

Follow these steps:

1. Install VirtualBox on your system (<https://www.virtualbox.org/>).
Instructions to configure VirtualBox are outside the scope of this book.
2. Using VirtualBox, create three virtual machines called `dockerhost-1`, `dockerhost-2`, and `dockerhost-3`, and install the latest version of Docker on it.
3. Make sure that there are no firewalls blocking access between `dockerhost-1`, `dockerhost-2`, and `dockerhost-3`.
